Summary

Computer Science graduate (August 2026) seeking **Software Engineer** roles. Built and deployed a full-stack web application with Python, FastAPI, PostgreSQL, and React, with a strong foundation in data structures and algorithms — **Codeforces Expert** (top 3.7%), **6th place medalist at the SRBD Code Contest 2025**, and two-time **ICPC Asia West Continental Finalist**.

Education

Comilla University

Bachelor of Science in Computer Science and Engineering — CGPA: 3.65/4.00

Cumilla, Bangladesh

Feb 2022 – Aug 2026

Technical Skills

Programming Languages: C++ (primary), Python, JavaScript, SQL

Backend and Web: FastAPI, RESTful API design, PostgreSQL, SQLAlchemy, Alembic, JWT and OAuth2 authentication, React, Git, GitHub

Machine Learning (basics): supervised and unsupervised learning with scikit-learn and pandas; PyTorch through undergraduate thesis work

Programming Achievements

- 6th place (Medalist), SRBD Code Contest 2025** — Samsung R&D Institute Bangladesh; top-50 finalist among 2,300+ participants from 150+ institutions; final held onsite, October 2025
- 4th place, ICPC Asia Dhaka Regional 2024** (304 teams) — best result in Comilla University history
- 6th place, ICPC Asia Dhaka Regional 2025** (311 teams); Chittagong Divisional Champion
- 8th of 2,490 teams, ICPC Dhaka Preliminary 2024**
- ICPC Asia West Continental Finalist**, 2024–25 and 2025–26 seasons
- Champion:** IIUC Tech Fest IUPC 2025, CUSS IT Fiesta 2024, BAIUST Junior IUPC 2023; **1st Runner-Up:** PU IUPC 2024
- Top-10 finishes:** KUET IUPC 2025 (6th), IUT ICT Fest IUPC 2024 (7th), SUST CSE Carnival IUPC 2024 (10th), CUET IUPC 2025 (10th)
- Codeforces:** Expert, max rating 1812 (top 3.7%); 2,500+ problems solved (64 rated 2100+); ranked #1 in Bangladesh in three rated rounds (best global rank 40 of 21,249)
- 3,000+ problems** solved overall across online judges; **35+ team contests**, frequently as team lead — full audited record: github.com/MHKhanCou/Contest-Performance

Projects and Research

AlgoVerse | *React, FastAPI, PostgreSQL* | github.com/MHKhanCou/AlgoVerse | live demo

- Built and deployed a full-stack algorithm-learning platform with interactive algorithm visualizers, a Codeforces profile analyzer, and a contest tracker; frontend on Vercel, backend on Render
- Designed a layered FastAPI backend (routes, services, repositories) with PostgreSQL, SQLAlchemy, and Alembic migrations; implemented JWT and OAuth2 authentication with email OTP verification and role-based admin moderation

View-Invariant 3D Human Pose Estimation | *Undergraduate Thesis; Python, PyTorch* | github.com/MHKhanCou/ViewInvariant-3D-Pose

- Built a monocular 3D human pose estimation pipeline: YOLOv8-pose keypoint detection, COCO-to-Human3.6M format conversion, and 2D-to-3D lifting with MotionAGFormer, with an interactive Gradio demo
- Reproduced the published Human3.6M baseline to within 0.05 mm (MPJPE 45.149 mm vs. 45.1 mm reported in the paper)

Leadership and Community

Comilla University Programming Club

2023 – Present

Instructor, Coordinator, Convenor

- Trained 100+ students through competitive programming bootcamps; curated problem sets and structured learning modules; hosted CoU CSE Fest IUPC 2025 (Chattogram Divisionals) as Convenor

National High School Programming Contest 2025

2025

Problem Setter, Volunteer

- Designed and authored algorithmic problems with comprehensive test data; supported technical operations and contestant coordination
